ABOUT ME

Senior Software Engineer with more than 10 years of experience across the full stack — from low-level C/C++ systems work (load balancers, performance-critical code) to modern web frontends (React, Vue) and mobile. Comfortable operating at any layer of the stack, with a track record of ramping up on new technologies quickly and delivering. Combines hands-on technical depth with team leadership experience, and a genuine enjoyment of hard problems and open-source contribution. Passionate about strong engineering communities — hosts a regular tech meetup and enjoys sharing knowledge through talks, writing, and mentorship

SKILLS & INTERESTS

Programming Languages Javascript/Typescript, Python, C/C++, Java

Frontend React, Next.js, Vue, TanStack, Zustand, UI Frameworks, Micro frontends

Backend Node.js, NestJS, Express, Django, PostgreSQL, MongoDB, Redis

Mobile React Native

APIs REST, GraphQL

Infra AWS (S3, EC2, RDS, EKS, Lambda), Google Cloud, Netlify

CI/CD Github Actions, Fastlane

AI Claude Code, Skills, Agents, MCP, OpenAI API

EXPERIENCE

Software Engineering Team Lead

Feb 2023 - Present

Crowded Technologies

Remote

- Led and mentored a team of 3 engineers, driving professional growth through regular 1:1s and structured feedback
- Implemented Tap to Pay functionality in the app, contributing upstream PRs to Stripe's open-source SDK — which was still in beta and not fully functional on iOS — to unblock our launch
- Developed the [Partners SDK](#), including custom web components and iframes for client integration, and whitelabeled the Crowded portal for partner use — collaborating directly with partners to gather and define requirements
- Led the initiation of a Vue-to-React migration, designing a bottom-up strategy using web components, a pub/sub system for cross-framework data sharing, custom Webpack configuration for code sharing, and a new test infrastructure to support incremental rollout
- Implemented biometric authentication for the mobile app, spanning both mobile and back-end development, enabling users to securely authenticate via Face ID/Touch ID (or fingerprint, depending on platform)
- Implemented a Fastlane-based CI/CD pipeline for the mobile team, reducing release time from several hours to under 30 minutes
- Improved team velocity and code quality by introducing Storybook, a test infrastructure, and a Notion-based design system — reducing code duplication and bugs while speeding up development
- Supported technical hiring for developer and QA roles, working closely with external recruitment agencies to source and evaluate candidates

- Fostered engineering culture through weekly Gather events featuring technical presentations, and contributed to engineering advocacy via technical [blog writing](#)
- Contributed to numerous additional initiatives, including Google Add to Wallet integration, portal authentication improvements, bulk operations via CSV import, frontend user-idleness tracking, feature flagging for the portal, and internal Claude Code tooling to support the Vue-to-React migration, among others
- Technologies: React, Vue, TanStack, Zustand, Web Components (Frontend) · Node.js, NestJS, Express (Backend) · PostgreSQL, MySQL (Databases) · AWS, Google Cloud (Cloud) · React Native, Java, Swift (Mobile) · Jest, Testing Library, Cypress, Github Actions (Testing and CI/CD), Claude, Cursor (AI Tooling)

Full Stack Software Engineer

Aug 2022 - Dec 2022

Humaans

London, United Kingdom

- Worked on a role- and entity-based permission system for Feathers.js, supporting granular read and write access control
- Technologies: Feathers.js, React, Knex.js, Redis

Full Stack Software Engineer

Jan 2022 - May 2022

Contentsquare

Remote

- Implemented team-based roles for the platform, including a new 'Super Admin' role
- Technologies: Vue, Vuex, TypeORM, NestJS, Node.js, PostgreSQL, AWS

Full Stack Software Engineer

May 2019 - Dec 2021

Winter Circle

London, United Kingdom

- Led the platform migration from AngularJS 1.x to React, doubling application performance (2x speed improvement)
- Built a Django Admin alternative in JavaScript (React Admin, Hasura, GraphQL, Node.js, PostgreSQL); open-sourced the package internally used at the company: [mihaildu/ra-resource-aggregator](#)
- Developed static marketing websites for clients — [marlinhawk.com](#) and [wintercircle.co](#) — using Gatsby, React, Netlify & Netlify CMS, and Node.js
- Built a report-generation platform surfacing ideal candidates for clients (eCharts, Thrive CRM, PostgreSQL, GraphQL, Next.js, React, Node.js, Heroku), including a custom GraphQL server to merge and reconcile inconsistent data across a CRM and internal database

Other Relevant Work

Nov 2014 - Apr 2019

- Software Engineer at Migacore Technologies (React, Redux, Flask, Python, Scrapy, AWS)
- Software Engineer at YLD Limited (React, GraphQL, Apollo, PostgreSQL, PubSweet, Docker)
- Software Engineer at SwiftServe Limited (C++)
- Software Engineer at VirtualMetrix Design (C)
- Freelancer (Javascript, Python, MATLAB)

PROJECTS

Introduction to Fitness | [mihaildu/fitness](#)

2022

- Open source book on fitness

EDUCATION

The University of Edinburgh | *MSc. in Artificial Intelligence*

2015 - 2016

Politehnica University of Bucharest | *BSc. in Computer Science*

2010 - 2014
